

CTGARMINLEAD
Patch Lead for Garmin Head Units

Installation Guide

www.connects2.com

APPLICATION

The CTGARMINLEAD is to be used in conjunction with a Connects2 Steering Wheel Control Interface and a Garmin Head Unit.

ABOUT THIS PRODUCT

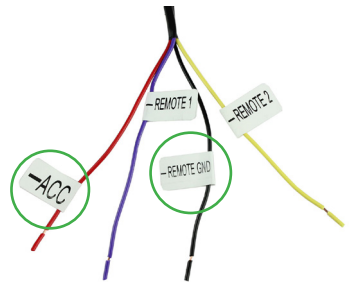

The CTGARMINLEAD takes advantage of the dual channel input and converts the Connects2 steering wheel control output into a format that will easily interface with any Garmin head unit on the market.

INSTALLATION GUIDE

NB: Before installation, make sure that the head unit is disconnected from the power source

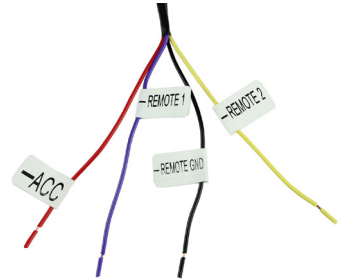

- 1 Connect the following flying wires from the CTGARMINLEAD to the head unit

Label	Function
ACC	12V Ignition Source
Remote GND	Remote Ground

- 2 The 'Remote 1' & 'Remote 2' wires will need to be joined together by means of a bullet.

Once bulleted, this needs to be connected to 'Key 1' on the back of the head unit.

- 3 Connect the molex connector from the CTGARMINLEAD to the Connects2 Steering Wheel Control Interface. Once connected, the head unit can be connected to the power source.
